H1 ICE HOOD

A 2mm One Size Fits All stretchy "ice-hood" that covers all exposed skin. Holes for mask and breathing device can be trimmed to perfection by the user. Also provides excellent protection against Jellyfish in infested waters.

Sizes: One-size
Item nr. 189099

PRODUCT SUMMARY

The body reacts to cold and heat by adjusting the blood stream to different parts of the body, like hands, fingers and feet. But the body can not adjust the blood flow to your head. This is to ensure brain function at all times. The colder it gets, the more heat you lose from the head by radiation, or by conduction in the water. You stay warmer with an effective hood.

Waterproof H1 hoods including the unique HAVS (Hood AirVenting System) are constructed with these scientific facts in mind and are proven to keep you warmer when you need it most. That is what we refer to as "Facing Reality".
